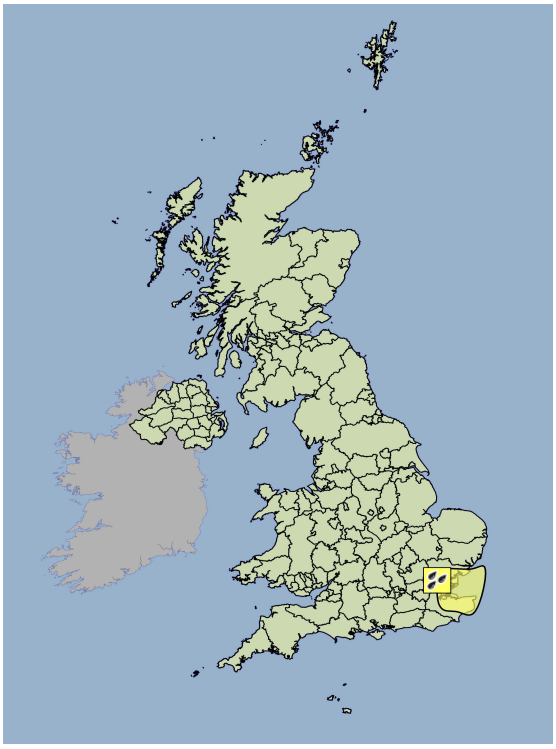
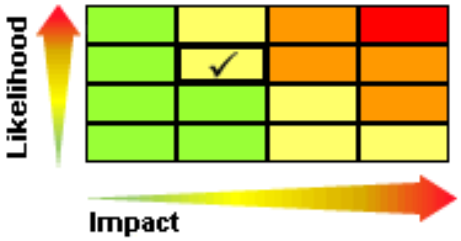
National Severe Weather Warning Service





Chief Forecasters Assessment
Rainfall accumulations from heavy showers across some parts of the south east are likely to increase this morning as the showers become slow-moving to bring more persistent rain in places. 20mm of rain in an hour is possible, with perhaps 40-50mm in 3 to 6 hours though most places will see much less than this. Where the heavier rain develops, some minor surface water flooding is possible.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **07:00 on Tue, 22nd Sep 2015** until **15:00 on Tue, 22nd Sep 2015**

Bands of heavy and occasionally thundery showers may become slow-moving in parts of south east England this morning. This is most likely across Essex and Kent and may result in longer periods of heavy rain with potential for some flooding. The showers will slowly move away southeast into the Channel this afternoon.
